Professional Experience:

Sears Holdings India

Jan-16 – Jan-18

- **Project Title: Shopsears**

Environment: HTML 5, Angular 4, TypeScript, CSS | Team Size: 8

Description: SHOPsears is iPad Tablet sales assistant application used within the Sears stores to sale products. These applications functionally work similar to Sears.com and also register at the store.

Roles&Responsibility: Worked as a developer in building and redesigning the Product details & Search component of SHOPsears application on new framework – Meteor using Angular 4(client side), meteor mini mongo & nodeJS(for server side programming).

- **Project Title: PunchTool**

Environment: HTML 5, Angular 4, TypeScript, CSS | Team Size: 3

Description: PunchTool is a web application used by sears store associate to punches their daily schedules. The goal of this project is to create real time notification for in early, out early and out of schedule punches.

Roles &Responsibility: As a Team member, worked on critical features of the Punch Tool like Offline Support, Multi language Support, working on the UI design of redesigning Punch Tool. As a part of this project, I worked on the critical task and deploying the application in production well within the time on 400 + sears stores without a P1/high priority issues.

- **Project Title: MobileWeb**

Environment: HTML, Angular JS, JavaScript, CSS | Team Size: 4

Description: E-commerce website of sears/kmart retailer designed for mobile.

Roles & Responsibility: As a part of this project, worked on the critical bug fixes of the mobile checkout layer.

FISERV

Feb-18 – Till date

- **Project Title: UWP(Unified Wealth Platform)**

Environment: HTML, Angular JS, JavaScript, CSS | Team Size: 4

Description: It is a wealth management application used by large enterprise for portfolio management, accounting, trading and improving investment decisions.

Roles & Responsibility: As a part of this project, worked on the critical features like Schedule withdrawals, generating different kind of reports and limited access mode functionality.

- **Project Title: TASC- Clux web (Total Administrative Services Corporation)**

Environment: HTML5, SCSS, Angular 6, TypeScript | Team Size: 4

Description: Clux-web is a Medical insurance portal which is primarily used by Client to manage different Benefit plans.

Roles & Responsibility: As a Team member developed numerous features like add participants against benefit plan via uploading file, posting summary, verify posting and many more.
